

AUTOMOTIVE & DIESEL TECHNICIAN TRAINING PROGRAM

UTI's Automotive/Diesel Technology program combines all of the courses from our Automotive Technology program with those in our Diesel Technology program, allowing you to prepare for each of these fields and get noticed by potential employers.¹

With the knowledge you gain through this program accredited by the ASE Education Foundation,² you will have the opportunity to work on import and domestic cars and trucks, buses and coaches, industrial equipment, fleet vehicles and much more.

You will also be prepared to work in oil fields, agriculture and farming applications, the marine industry, and other places where diesel engines are found. And, our industry relationships ensure you'll learn the skills manufacturers say matter most, using current technology and equipment through our blended learning education model that includes online and hands-on training in our state-of-the-industry facilities.

Also, our Manufacturer-Specific Advanced Training (MSAT) programs provide more opportunities to specialize your training.⁴

CAREER PATHS: MORE TRAINING MEANS MORE OPTIONS

When you graduate from UTI's Automotive/Diesel Technology Program, you'll be able to pursue a variety of career paths. For even more options, consider adding a Manufacturer-Specific Advanced Training program featuring a particular line of vehicles.

CUSTOMIZE YOUR TRAINING TO MATCH YOUR GOALS

Select the training program that gives you the freedom to pursue the right career for you. Before selecting your training program, consider your career path and think about opportunities for advancement that might appear along the way. Then, choose the training that will help you take advantage of those openings. Remember, the best careers don't always follow a straight line but with the right training, you'll have more control and be prepared for options in the future.
