

My Success Story

Name:

Michael Ren Gantt

Title and Employer:

Instructor
G. Frank Russell Technology Center

UTI Campus:

UTI-Houston

“UTI was 100% a great return on my investment. They gave me the skills and know-how to be successful.”

How it All Started

During my senior year of high school, I had no direction until I heard the UTI presentation. I was interested in Collision Repair and did not want to attend a four-year school. I always loved painting and working on cars, so I felt that UTI was the best choice for me.

My Time at UTI

When I started at UTI, I had the basic knowledge and experience. The hands-on training was very important as that is how I learn best. The instructors were very helpful and truly wanted to see us succeed in life. UTI gave me the knowledge and confidence to be successful. While confidence comes with time, I felt comfortable with the knowledge I got from UTI. I also took the Toyota advanced training program. It gave me an advantage over other technicians* and would allow me to increase my income with the extra knowledge and skill set I gained.**

The Future is Bright

UTI was absolutely 100% a great return on my investment. They gave me skills and know-how to be successful. Moving away helped me grow up and to have a good paying career. If I had not attended UTI, I'd probably be working in a paint shop just getting by.

Chosen by Industry. Ready to Work.
